

# Disability Sport & Recreation Strategic Plan 2020-2025

Better choice, better access and better participation in sport and recreation for **all** Victorians with disability

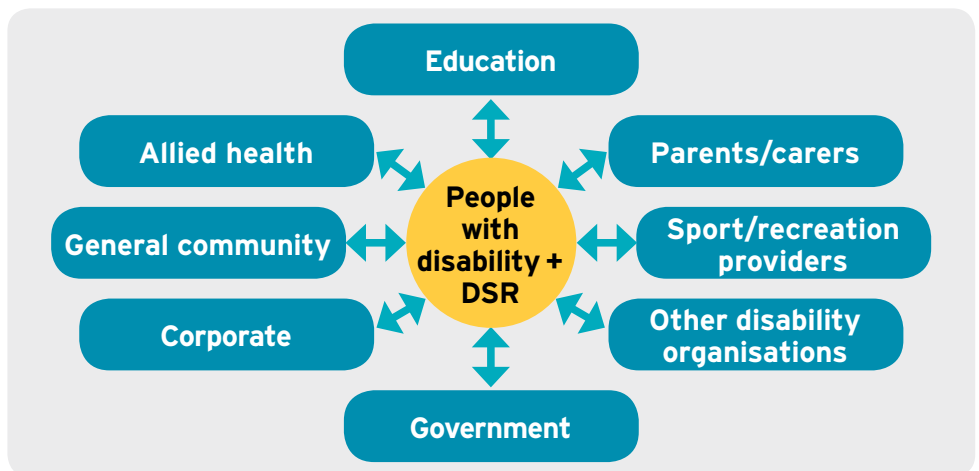

## Our vision

A Victoria where **all** people with disability can choose and access any sport or active recreation they want to engage with.

## What success looks like

- **A powerful voice** for people with disability in sport and active recreation.
- **A new movement for change** to help make physical activity a reality for all people with disability.
- **Better choice** - People with disability have more sport and active recreation opportunities to choose from. They can make decisions, set goals and receive the support they need to meaningfully engage with the sport or active recreation opportunity they choose.
- **Better access** - More sport and active recreation opportunities will be accessible to people with disability by taking into consideration the physical environment, information, procedures and attitudes.
- **Better participation** - More people with disability will meaningfully engage with sport and active recreation as a direct result of increased choice and access.

**Join us! We welcome everyone to join the movement.**
